HOW TO USE AURIN

AURIN PORTAL

Securely access, map and analyse high quality datasets from across disciplines.

AURIN OPEN APIS

Programmatic access to data via desktop GIS, statistical packages, or mobile apps.

AURIN MAP

Access and view nationwide maps across a range of datasets, indicators and indexes.

HELP TUTORIALS

Access our comprehensive catalogue of help documentation and quick reference tutorials showing you how to use every component the AURIN workbench to support your research and policy making. We also have additional resources explaining spatial concepts, principles of statistics, and other software tools.

AURIN DATA

AURIN comprises the largest single resource of thousands of datasets relating to Australia's towns and cities. Browse our extensive data catalogue, where you can search by location, data provider and theme to see whether or not AURIN has the right dataset to power your research or policy program, or find out how you can become an AURIN data provider

OTHER WORKBENCH TOOLS

AURIN's portfolio of decision-support products includes tools to enable better evidence-based policy development and decision-making and more sophisticated analysis. Using cutting-edge simulation and scenario-planning techniques, these tools provide the opportunity to explore new ideas for urban growth and planning.
